

Silo Material Storage

Nu Vu Conair Silos Storage are engineered for the safe, efficient, and reliable storage of virgin & regrind plastic granules. Manufactured from high-quality steel (SS-300 & SS-200 series) with robust structural construction, Nu Vu Conair silos are suitable for both indoor and outdoor installations. The silos are designed to maximize storage capacity while minimizing floor space requirements, making them an ideal solution for modern manufacturing facilities. Integrated with pneumatic conveying systems, the stored material can be automatically transferred to production lines, day bins, or machine hoppers, eliminating manual handling and improving operational efficiency.

Schematic

SS-304 Series

JT-200 Series

Optional Load Display & Inventory Control System

- Real-time monitoring of silo material level and inventory.
- Continuous display of available material quantity in each silo.
- Helps prevent material shortages and production interruptions.
- Integration with plant automation and SCADA systems.

Technical Specifications

Capacity in m³ (CONE 90°)	Height (mm)	OD (mm)	Bottom (mm)	Outlet (mm)	Ground Clearance (mm)
	A	B	C	D	
9	5350	2200	2420	300	950
15	5700	2800	3100	300	950
20	6700	3000	3300	300	950
35	7000	3640	4000	300	950
44	7950	3640	4000	300	950
